Consumption from the industrial segment grew by 3.9% to 3,418 GWh, due to the return to the captive market of free customers. At the end of the period, this segment represented 28.0% of Copel's captive market, with the Company supplying power to 90,963 industrial customers.

The commercial segment consumed 2,851 GWh between January and June 2015, 4.1% up year on year, due to the 6.9% increase in the number of clients, partially offset by lower average consumption, as a result of lower temperatures at the beginning of 2015. At the end of June, this segment represented 23.3% of Copel's captive market, with the Company supplying power to 372,543 commercial customers.

The rural segment consumed 1,203 GWh, growing by 1.4% in 1H15, mainly due to the sustained excellent performance of agribusiness in the State of Paraná. At the end of June, this segment represented 9.8% of Copel's captive market, with the Company supplying power to 371,632 rural customers.

Consumption from other segments (public agencies, public lighting, public services and own consumption) presented a slight decrease compared to the same period in 2014 totaling 1,168 GWh.
